

ENERGY POLICY

- To provide a framework for establishing and reviewing energy objectives and targets, and to ensure the provision, accessibility, and continuous update of the necessary information, resources, and support required to achieve these objectives and targets,
- To continuously improve, document, communicate, review, and update our Energy Management System and energy performance in line with the purpose and scale of our organization,
- To comply with all applicable energy-related laws, regulations, and other relevant requirements,
- To reduce energy consumption, implement initiatives for continuous improvement in energy efficiency, and monitor their effectiveness,
- To procure and utilize energy-efficient products and services in order to enhance energy performance, and to prioritize energy efficiency in design activities,
- To raise energy awareness and responsibility across all levels of the organization from top management to operational staff by providing comprehensive energy-related training to all employees,
- To engage in open communication with all stakeholders and share energy-related information when necessary.
